

DET DIAGNOSTIC KIT

SPEC SHEET: TACTICAL ELECTRONICS

EOD TOOL
KITS

DESCRIPTION

The DET Diagnostic Kit provides EOD & Bomb Technicians with the ability to safely perform electronics diagnostics. This kit includes all tools required to perform detonator or switch diagnostics; and provides the operator with equipment to perform diagnostics on analog intrusion detection systems. The DDK also includes Wire Attack Special Purpose Probes (WASPP), which allow operators to make noninvasive electrical measurements of wires. The WASPP includes 6 specialized “bed of nails” piercers with volt meter leads and 6 extensions. These probes pierce the insulation of wires and contact the internal conductor at multiple points providing positive connection and ensuring the most accurate measurements.
